ReSound LiNX<sup>2</sup>

The smartest way to manage your tinnitus

ReSound

rediscover hearing

# Take control of your tinnitus

ReSound LiNX2™ delivers a game-changing approach to managing your tinnitus.

Our fifth-generation tinnitus solution, ReSound LiNX2 combines advanced, personalised tinnitus therapy with the new benchmark in Smart Hearing aids.

## FIND RELIEF

ReSound LiNX2 offers relief from the disturbing sounds you hear with sound therapy that diverts your attention away from your tinnitus. You can browse a selection of preset filtered sounds and six soothing Nature Sounds™

to find the sound therapy that works best for you. You can also stream any sound from your iPhone, iPad, iPod touch, or the ReSound Unite™ Mini Microphone directly to your ReSound LiNX2 hearing aids. Together with amplification and informed counseling, sound therapy has proven to be a highly effective way of managing tinnitus.

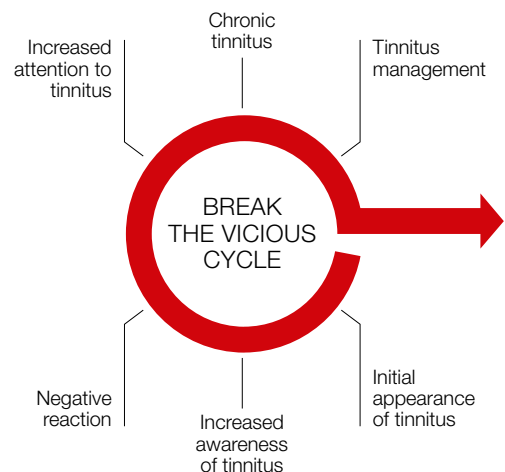

## INDIVIDUAL SOUND THERAPY

Tinnitus is often compared to a candle in a dark room. It seems bright and hard to ignore until you turn the lights on and it blends in with the ambient lighting. The sound therapy built into ReSound LiNX2 is a little like turning on the lights. Over time, your tinnitus can blend into the background and you no longer notice it.

## THE VICIOUS CYCLE

The severity of your tinnitus depends on how much attention you pay it. When the disturbing sounds prompts negative feelings, it can become more and more difficult to ignore, and a vicious cycle begins. The aim of tinnitus therapy is to break this vicious cycle.

Your hearing care professional can help you personalise the sound therapy options built into your ReSound LiNX2 hearing aids – and together you can break the vicious cycle.

# A personalised solution

ReSound LiNX<sup>2</sup>™ enables you to personalise your sound therapy so you get the greatest possible relief from your tinnitus.

ReSound LiNX<sup>2</sup> works by diverting your attention away from tinnitus with soothing background sounds. Your tinnitus – and your taste – are unique. So your idea of a soothing sound may be very different to someone else's. That's why ReSound LiNX<sup>2</sup> hearing aids come with a pre-installed selection of tinnitus therapy sounds and sounds from nature. And the ReSound Smart™ app\* makes selecting and adjusting these sounds easy, so you can quickly find relief from your tinnitus.

## TINNITUS TUNER™

Find a personalised setting that provides you with relief from your tinnitus. You can use the tuner on the ReSound Smart™ app to control the pitch and modulation of the sound to create the sound therapy that works best for you.

## NATURE SOUNDS™

Try out the six pre-installed nature-inspired sounds, including 'Shoreline' and 'Beach Surf'. Simply select the sounds with the ReSound Smart app and find out which one works best for you.

## DIRECT CONNECTION TO EVERYTHING YOU LOVE

Pairing your ReSound LiNX<sup>2</sup> hearing aids to your iPhone, iPad or iPod touch makes them work like wireless stereo headphones. So you can stream any sound you like to help distract you from your tinnitus.

And, of course, you will also be able to make hands-free phone and video calls, listen to music, follow workout programs, and much more – with no need for additional hardware.

## RESOUND UNITE™ MINI MICROPHONE

You can also stream sound from your TV, computer or Bluetooth-enabled phone directly to your hearing aids with the ReSound Unite Mini Microphone.

## THE RESOUND RELIEF™ APP

ReSound Relief is a multisensory app that combines a variety of sounds, including customisable, dynamic soundscapes and guided relaxation exercises, to help distract you from your tinnitus.

\*Advanced tinnitus management features are available in version 3.1 of the ReSound Smart app.

# ReSound LiNX2™ is the perfect solution for people with tinnitus and hearing loss

Inspired by nature, Surround Sound by ReSound™ is our unique system for processing sound. Using advanced technologies that emulate the human ear, we take full advantage of your brain's natural ability to recognise sounds and pinpoint where they are coming from.

In a recent independent benchmark test of the latest hearing aids from leading manufacturers, experienced hearing-aid users gave Surround Sound by ReSound a top rating across a variety of different sound environments\*.

GET A VIVID SENSE OF SPACE AND SPEECH  
ReSound LiNX2 includes the latest Surround Sound by ReSound, which delivers strong spatial awareness and speech understanding. So in a complex listening situation you'll hear all the sounds around you. And even when noise levels get high, you'll still be able to join in the conversation.

This is the essence of ReSound LiNX2. No manual adjustments. No compromise in sound quality or listening comfort. Just effortless hearing as nature intended.

ReSound LiNX2 is for everyone with a mild to severe-to-profound hearing loss.

\* 2013 Benchmark test, DELTA SenseLab.

A photograph of a man and a woman embracing from behind, looking out at a sunset. The man is wearing a plaid shirt, and the woman has long hair. The sky is a mix of blue, purple, and orange.

# The most important part of the solution is you

ReSound LiNX<sup>2</sup>™ can help bring relief from tinnitus, but it doesn't happen overnight. Your input, your feedback – and your commitment – are key to understanding your own tinnitus and discovering the sound therapy that will help you the most. For the best results, you and your hearing care professional will work together over a number of visits. This is what you can expect from tinnitus management:

STEP

1

#### **Initial consultation and counseling**

What is tinnitus?  
Evaluation of hearing/tinnitus  
Symptoms and concerns  
Management options

STEP

2

#### **Fitting with ReSound LiNX<sup>2</sup>**

Introduction of sound therapy  
Personalisation of sound therapy  
Continued support and counseling

STEP

3

#### **Follow-up visits and counseling**

Discussion of progress  
Adjustments in sound therapy if needed  
Continued support and counseling

## Fit, style, and choice are all yours

Modern, discreet and durable, ReSound LiNX2™ hearing aids are available in a full range of designs and colours. So when it comes to comfort and lifestyle, you're sure to find the perfect fit.

NEW FULL RANGE OF HEARING AID DESIGNS

ReSound LiNX2 hearing aids are not just an exquisite piece of miniature engineering. They also look great. Not that you'll notice. Because ReSound LiNX2 hearing aids are so discreet and comfortable that you'll forget you have them on.

Our receiver-in-ear and behind-the-ear designs include SureFit™ – a new, smaller design for the part of the hearing aid that fits into your ear canal. They may be tiny, but SureFit receivers, thin tubes and domes are big on listening comfort and sound quality thanks to improved sound performance.

Our new designs stand up to the punishment of everyday life. Constructed from high-quality, durable materials, every component is coated with iSolate™ nanotech inside and out to repel water, dust, and corrosive substances such as earwax and salty sweat. Even the SureFit receivers, thin tubes and domes get the iSolate nanotech treatment.

ReSound® helps people rediscover hearing with hearing solutions that emulate the function of the natural ear. Our aim is to give you the opportunity to live a rich, active and fulfilling life unaffected by hearing loss.

ReSound LiNX<sup>2</sup>™ is the new benchmark in Smart Hearing, giving you exceptional sound quality, speech understanding and spatial awareness. You will be able to stream stereo sound directly from your iPhone, personalise your hearing experience on the fly, and engage effortlessly with family, friends and colleagues in any listening situation.
